

WHO Medical Devices Newsletter

January 2020

Dear colleagues

As the new year begins, first we want to thank all your collaboration to the medical devices and related areas and we look forward to continue working with you with the goal of increasing access to good quality medical devices that are affordable, available, appropriate, and used safely for the wellbeing of patients around the world.

Second, we want to wish you a healthy, joyful and prosperous 2020 for you and your families.

May we keep working together to have the right technology to diagnose early and treat effectively all patients in need, regardless of where they are.

Please find below the January 2020 news:

1. The Health for all film festival

The Health for All Film Festival

Arabic | BZ | Français | Pycckий | Español

“Film has the unique ability to make us feel. To make us laugh, cry and think. Through the creation of compelling human-interest stories, filmmakers have the potential to influence health and catalyze change. Films are a powerful way to raise awareness, improve understanding and encourage action. That's why in May 2020, on the occasion of the 73rd World Health Assembly, WHO will host the first-ever **Health for All Film Festival** in Geneva.

Whether you are an amateur filmmaker seeking to tell the story of change-makers in your community through the lens of your smartphone or you're working with a production company to promote dialogue around global health challenges and solutions, WHO wants to see your story. The Health for All Film Festival aims to put storytelling power in the hands of people and seeks to showcase the role of individuals and communities as champions for health and well-being. Only films completed between 1 January 2017 and 30 January 2020 are eligible for this festival. **Closing date for entries is 30 January 2020.**

- [Global health observatory, data repository](#)

Action requested:

We kindly request your help to bring-up-to-date the figures of each country. Each request for edition needs to be sent to medicaldevices@who.int.

2.2 Information to know about the need and use of nomenclature for medical devices

Standardization of medical devices nomenclature

International classification, coding and nomenclature of medical devices

If you use naming, classification, coding, nomenclature of any kind of medical devices including in vitro diagnostics, WHO will welcome your input in the following **SURVEY**.

2.3 Technical specifications for procurement of assistive technologies

The consultation opens until 12th January

2020. https://www.who.int/phi/implementation/assistive_technology/aps_open_consultation/en/

3. Mark your calendars for 2020:

2020 year of the nurse and midwife:
